

# Find Ten

A game for 3 to 4 players

## You'll need:

- Four or more sets of cards

## How to play:

1. Shuffle the cards.
2. Put the stack face down on the table.
3. Turn over the first card.
4. Player 1 takes the next card.
5. If the card on the table and Player 1's card makes 10, Player 1 keeps the cards and gets another turn.
6. If they don't make 10, Player 1 puts the card face up on the table and it is Player 2's turn.
7. Take turns taking a card and making ten with any card that is on the table.
8. If there are two cards on the table that make ten, the next player takes a card, puts it down, and picks up the two cards that make ten. Then that player takes another turn.

## Who wins?

When all the cards have been played, the player with the most cards wins.

## Teacher Notes:

Students can use 0-10 cards, playing cards with the face cards removed, ten-frame cards, or transition cards with both the ten frame and the numeral on them. If you use playing cards, you might want to use a marker to turn one of the face cards or the joker into a zero.

Students can watch the video which will show them how to play the game.
