

# Introduction to ST Math Activity Pages

These ST Math Activity Pages are like a playground of your favorite ST Math games, on paper.

The pages build off of the learning in ST Math games.

Scan the QR codes to play ST Math games.

Students engage in problem-solving.

STEP 1

## Try out the Activity Pages

These **optional** activity pages are new resources we are developing. We wanted to give you a chance to try them with ST Math Immersion and help us make them better.

These pages are fun and versatile. There are many ways you could use them:

- Use them for small group instruction.
- Assign them as warm-up activities.
- Give them for homework or enrichment.

STEP 2

## Complete the feedback survey

Share your **feedback** when you're done.

- What did you like?
- What didn't make sense?
- What could be better?
- Do you have ideas that we should include?

Your students will have the opportunity to...

Engage students in the **Problem Solving Process** to facilitate their thinking.
