

# Discovering Trends Plan

Trends are important to help determine if a challenge is pervasive across the grade level and/or grade band. Trends can help us examine our interventions, cause us to review and strengthen our sequence of curriculum, give us the information we need to make critical connections across mathematics to better support student understanding. As you review your data, use this tool to help organize the information you observe in the data.

**Grade Level/Grade Band** \_\_\_\_\_ **Data Source(s)** \_\_\_\_\_ **Date** \_\_\_\_\_

TRENDS OBSERVED	QUESTIONS RAISED BY THE DATA
POSSIBLE BARRIERS/CHALLENGES	STRATEGIES TO ADDRESS CONCERNS
