

OBJECTIVE COMPLETION TRACKER

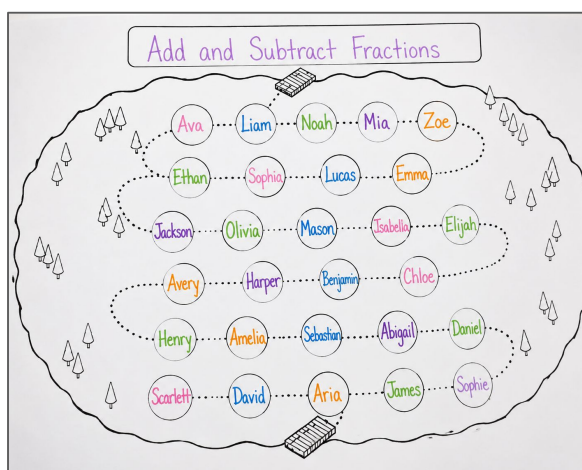

Description: Celebrate progress toward ST Math objectives, make learning visible, and encourage students to reflect on their mathematical growth.

Teacher Directions

- Choose the tracker that best matches the number of students or objectives you would like to track.
- Write in the tracker before using it with students.
- Display the tracker in the classroom or provide individual copies to students.
- Teachers can choose from two ways to use the Objective Completion Tracker:

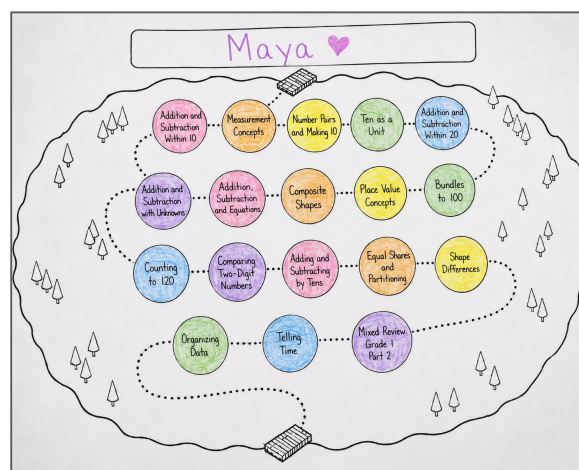

Class Tracker

- Print one tracker for each ST Math objective.
- Write the objective name in the box at the top.
- As students complete the objective, have each student write their name in a circle or color in a circle.
- Continue until every student has completed the objective and the class has filled the path.
- Celebrate when the class reaches the end of the island!

Individual Student Tracker

- Provide each student with their own tracker.
- Write the student's name in the box at the top.
- Write one ST Math objective in each circle.
- As the student completes an objective, have them color in the corresponding circle.
- Students can watch their progress grow as they make their way across the island.

Great Math Conversations to Accompany This Tracker:

- Which objective are you most proud of completing? Why?
- Which objective was the most challenging for you? What helped you keep going?
- What strategy or math tool helped you solve a challenging puzzle?
- What is something you understand now that you did not understand before?
- How did something you learned in ST Math connect to math you are learning in class?
