

FRUIT MONSTER

$4 \times 3 = \square$

$4 \times 4 = \square$

$\square \times 5 = 15$

It's our birthday soon and we each want a cake. The recipe calls for 3 cups of sugar and 4 eggs. Each cake will have 10 slices.

$\square \text{ cups of sugar} = 2 \times 3$

Isaiah

Lillian

There's a $\times 2$ in each of these equations because...

$2 \times \square = \square \text{ eggs}$

$\square \times \square = \square \text{ slices of cake}$
