

# Welcome to the ST Math Activity Page

This activity book is like a playground of your favorite ST Math games.

Scan the QR codes to play the ST Math puzzles related to each page.

I like the challenging problems in this pages because I like the feeling when I figure it out.

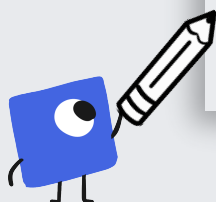

I like problems that are:

- |                                     |                                |
|-------------------------------------|--------------------------------|
| <input type="checkbox"/> tricky     | <input type="checkbox"/> easy  |
| <input type="checkbox"/> complex    | <input type="checkbox"/> short |
| <input type="checkbox"/> open-ended | <input type="checkbox"/>       |

because...

The problems remind me of the games in ST Math.

There are many ways to show your thinking.

## What's Inside?

### Bird Expressions

4 + 2 = [ ]

2 + 1 = [ ]      4 - 2 = [ ]

5 - 3 = [ ]      5 + 1 = [ ]

3 + [ ] = [ ]

Draw

Model

$$2 + 3 = 5$$

Match

3

Write

Fill in

This is your math journey, so make this book **yours** - fill it with **your** ideas, make mistakes, and challenge yourself!

What if I don't know what to do?

Try writing down what you think and then see how your ideas work out.

What if I don't get it correct right away?

Mistakes are okay because you can always come back to it. And mistakes help us learn!
