

**LOCATION:** Johannesburg

**DID YOU KNOW?**

Logan would love to visit the Johannesburg Zoo, home to over 2000 animals represented by 320 species. The zoo spans over 200 acres of land. The zoo was founded in 1904. The original collection of animals when it opened included one lion, one leopard, one giraffe, two Sable Antelope bulls, one Baboon, one Genet, a pair of Rhesus Monkeys, a pair of Porcupines and one Golden Eagle. On average, how many needles does a porcupine have?

The Zoo Snooze is like a big science sleepover, and I LOVE science!

Logan

**JOHANNESBURG MATH:**

**OTHER FUN FACTS:**

- Johannesburg sits on the world's largest known gold deposit
- It is nicknamed Egoli or Jozi, which means "place of gold."
- August 2012 was the last recorded snowfall.
