

LOCATION: Coral Triangle (Loggerhead turtle)

DID YOU KNOW?

The Coral Triangle is located in the Pacific Ocean around Indonesia, Malaysia, the Philippines, Papua New Guinea, Timor Leste, and the Solomon Islands. Within this nursery of the seas live 76% of the world's coral species, at least 2,228 reef fish species, and 6 of the world's 7 marine turtle species. Sarah loves turtles and many other reptiles. She has a great sense of humor, too, as you can probably tell from her joke. The loggerhead turtle is one species located in Coral Triangle. What is the average lifespan?

What kind of pictures
do turtles take?
Shell-fies!

Sarah

CORAL TRIANGLE MATH:

OTHER FUN FACTS:

- The Coral Triangle covers over 2.3 million square miles.
- It is sometimes called the "Amazon of the Seas".
- 16 species of whale and dolphin migrate each year to the coral reef - most famous mammal is the Blue Whale.
