

WHY JIJI THINKS IT ROCKS!

Way out in Australia, there's a cool place called Purnululu National Park. Inside it, you'll find giant round rocks called the Bungle Bungles. These rocks look just like huge beehives—with a unique orange-and-black ringed pattern! Some scientists think these funny-looking rocks might have been formed when a giant space rock - like a meteor - crashed into Earth a long time ago!
